

4156

teams sit  
together!  
pick up paper

page 1

10/4/16

assignments coming up:

tonight - practice with development  
technologies (pair)

Thursday - reuses project proposal (team)

next Tuesday - practice defining  
tasks (pair)

---

design sprints 5 days

show video

concept designed by Google Ventures  
(GV), initially for their startup portfolio

many of these companies are  
not in the SW industry

intended to apply to any industry

also defined research sprints  
4 days (user research - recruit <sup>5 people</sup>,  
schedule/plan x 2, interview +  
summarize)

4156

10/4/16

Ø th day - set the stage  
assemble team, set up space,  
buy supplies, etc.

Monday

morning { "start at the end" - what is long-term goal?  
"map the challenge" - workflow sketch

afternoon { "ask the experts" - interview w/rt them  
take on map  
"how might we" - approach to taking  
notes during  
interviews  
then sort into categories  
pick a target within map to  
focus on during rest of sprint

4156

10/4/16

Tuesday

review existing ideas (from other products) to remix & improve

everyone separately sketches ideas  
crazy 8s - sequence of 8 pictures

Wednesday

go thru piles of sketches  
& choose best

weave best into story board &  
fill in gaps

Thursday

implement a "fake it" prototype

trial run

Friday

1-on-1 interviews with 5 "customers"

make a plan

4156

10/4/16

getting from hand-drawn sketches  
to what to show "customers"

wireframes = one screen

storyboard = sequence of screens

can still draw by hand, but scan/photo  
or use tool

show wireframes.cc

---

team exercise - teams <sup>sit</sup> together!   
pick up paper

we'll condense week into  
today's remaining class time  
plus some after-class work

can students hold a virtual  
meeting or set of very short  
meetings (must do this week,  
before Thursd deadline)

4156

needs  
about  
half an  
hour

page 5

10/4/16

"Monday"

your long term goal is a  
minimal viable product  
for your project

spend 5 minutes mapping out  
workflow + talking about it

pick one point w/in map  
might be user story or even  
just part of a user story

"Tuesday"

spend 5 minutes talking about  
existing systems you know  
of that do something  
similar/related to that or part

each member of team then  
sketches separately for 5  
more minutes

4156

10/4/16

"Wednesday"

Spent 5 minutes picking best sketches & weave together

"Thursday" no prototype

after class, find a photocopier & make copies of those best sketches for every team member

"Friday"

every team member find at least one person to show the copies to and ask their opinion

at begin of class Thuz then whole team meet to discuss what you learned (stand up meeting - can do before class on Thursday in hall)

feeds into nurses project proposal due Thursday night
