# Team Composition: Team Assignment A

Form a team of *exactly* four students, subdivided into two pairs of two students each.  Make up a name for your team.

Submit a single file listing the team name and the full names and unis of all four students, with an indication of which two students constitute one pair and which two constitute the other pair.  The name of this file should include the team name, e.g., FantasticFour-teamcomposition.pdf, CodeBusters-teamcomposition.txt. Only one member of each team should submit. You should submit as soon as possible after you have a four-student team, you do not need to wait for the deadline.  Submit your file in canvas (**https://courseworks2.columbia.edu/**), do not submit anything by email or on paper.

Every team will be assigned a mentor (an instruction assistant) soon after the team composition deadline. You should arrange to meet with your mentor as soon as possible, before the project proposal deadline.

If by class time on the due date you do not have a team of four, ask for help at the *beginning* of class and we will try to arrange teams during class time.  Ask for help if you have a team of 1 (just yourself), 2, 3, 5, 6, or any other size that's not 4.  Do NOT wait until the end of class, when everyone is leaving, to ask for help.  If the class enrollment is not conveniently a multiple of four, which it probably won't be, we will improvise during class time.

If for any reason the submission deadline is imminent and you still do not have a team, make sure you still submit.  In this case, submit a single file listing your full name(s) and uni(s), and include your uni(s) in the file name.  For example, gek1-teamcomposition.txt for a solo student who has not joined a team or jbh2019_ras2105_teamcomposition.doc for two students who have not found another pair. Submit your file in canvas (**https://courseworks2.columbia.edu/**), do not submit anything by email or on paper.
